Walshs Viewguard Laminate

Walshs Viewguard Laminate is an engineered, toughened laminated and/or heat strengthened balustrade and canopy solution. It offers the ability to experience clear unobstructed views, natural light and safety without the need for handrails – all while having the look you require.

Thanks to its Kuraray SGP Interlayer, Walshs Viewguard Laminate is up to 100 times stiffer and five times stronger than traditional interlayers.

Walshs Viewguard Laminate is an engineered glass product. Engineering is required to determine thickness, sizing and installation method, ensuring Australian compliance and the highest-level safety for your application.

Benefits

- Walshs Viewguard Laminate will not collapse even when shattered
- When impacted, Viewguard Laminate will not be subjected to uncontained shattering or disperse harmful glass splinters
- Significant customisation options to meet project requirements or remediation of existing works
- 5-year warranty against delamination
- Enjoy frameless, unobstructed views – produced with high-quality polished edges, Walshs Viewguard Laminate has outstanding permanent clarity enabling you to achieve seamless views and natural light
- Excellent UV and moisture resistance
- Less likely to turn yellow after prolonged exposure to sunlight.

Important information

Frameless balustrades and canopies must be certified by an engineer before installation.

Architectural specification process

For customisation and specification of this product for your project please contact our Walshs Sales Team on 08 9366 6666.

Available thicknesses

- 13.52mm to 26.28mm
