

Walshs Mirror

Walshs Mirror serves so many purposes. It allows us to see who we are and reflects our personality to those we invite into our home or business. It is also ideal for surveillance, security and applications where one-way observation is required.

Where glass is subject to human impact as per AS1288, a safety rated mirror product must be used. Walshs Mirror A Grade Safety is available in a 4mm and 6mm vinyl backed mirror and a 6.76mm Walshs Laminated Mirror.

Walshs Mirror can be tailored to complement the interiors of your home or business and comes in clear, grey, and bronze finishes.

Benefits of Walshs Mirror

- Walshs Mirror can be laminated to become a Grade A Safety Glass to AS1288.
- Clear, grey, and bronze options available.
- One way vision for privacy available (can come in 8.76mm SS08 laminate for one-way applications). A successful application requires a brightly lit subject side and a darker observation side with the correct use of lighting.
- Can be produced with polished and bevelled edges.
