

Walshs Printed Splashback

Walshs Printed Splashback is a specialised product of the printed glass range, offering myriad opportunities for architects, interior designers, and their clients.

Walshs Printed Splashback utilises high resolution images that will make a truly individual and customised statement. The digital art glass used in our Printed Splashback range creates prints that are vibrant and true to life, with the additional use of low iron toughened glass allowing for increased clarity and vibrancy of hues.

As applications can come in different shapes and sizes, Walshs Glass' in-house graphic designer offers the best possible outcome for every print. Customers can use their own high-resolution images, consider Walshs Glass' own standard range of designs – there are 256 colours to choose from! - or select from a large library of royalty free stock images. Custom designs are also available on request, providing endless options.

Benefits of Walshs Printed Splashbacks

- A made to measure product that offers myriad ways to transform a room or environment.
- Vibrant and true to life colours incorporated with the use of low iron glass.
- Seamless images over multiple panels, including a colour matching service.
- Images can be printed to be viewed from both sides of the glass.
- Clean lines and large dimensions (2500mm x 3000mm) - resulting in less joins.
- Hygienic, easy to clean, non-porous, maintenance free and stain resistant surface.
- Necessities such as power points, switches, cupboards, and range-hoods can be accommodated without compromise.
